

Next.js Internal Quotation System (MVP)

UI/UX Architecture & Technical Generation Specification (Option A - Internal Focus)

1. Document Purpose & AI Prompt Instructions

This document serves as a complete layout blueprint and technical schema for an internal-use **Quotation Management Application** built with Next.js (App Router), Tailwind CSS, and Shadcn/UI. It is optimized to be copied and fed directly into generative UI/UX AI tools (such as v0.dev, Claude 3.5 Sonnet, OpenCode, or Bolt.new) to automatically produce production-ready frontend components.

2. System Architecture & Tech Stack

- **Framework:** Next.js 14+ (App Router, Server Actions for data mutations)
- **Styling:** Tailwind CSS (Utility-first, responsive, slate/blue corporate palette)
- **Component Library:** Shadcn/UI (Built on Radix UI & Lucide Icons)
- **Database / Backend:** Supabase (PostgreSQL) for relational state and storage
- **PDF Engine:** Browser-native print styles (`@media print`) or server-side rendering

3. Database Schema Blueprint (PostgreSQL)

Feed this exact relational setup into your AI or Supabase SQL editor to manage state instantly:

```

-- 1. Customers Table
CREATE TABLE customers (
    id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
    name VARCHAR(255) NOT NULL,
    phone VARCHAR(50),
    email VARCHAR(255),
    address TEXT,
    created_at TIMESTAMP WITH TIME ZONE DEFAULT NOW()
);

-- 2. Quotations Table
CREATE TABLE quotations (
    id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
    quote_no VARCHAR(50) UNIQUE NOT NULL, -- e.g., PW-2026-001
    customer_id UUID REFERENCES customers(id) ON DELETE SET NULL,
    issue_date DATE NOT NULL DEFAULT CURRENT_DATE,
    status VARCHAR(20) NOT NULL DEFAULT 'Draft', -- Draft, Sent, Approved, Revised
    subtotal NUMERIC(12, 2) NOT NULL DEFAULT 0.00,
    discount_percentage NUMERIC(5, 2) DEFAULT 0.00,
    tax_percentage NUMERIC(5, 2) DEFAULT 0.00,
    grand_total NUMERIC(12, 2) NOT NULL DEFAULT 0.00,
    notes TEXT,
    created_at TIMESTAMP WITH TIME ZONE DEFAULT NOW()
);

-- 3. Quotation Line Items Table
CREATE TABLE quotation_items (
    id UUID PRIMARY KEY DEFAULT gen_random_uuid(),
    quotation_id UUID REFERENCES quotations(id) ON DELETE CASCADE,
    item_title VARCHAR(255) NOT NULL, -- e.g., Topleaf Cinnamon Pouch Label Design
    description TEXT,
    quantity INT NOT NULL DEFAULT 1,
    unit_price NUMERIC(12, 2) NOT NULL DEFAULT 0.00,
    line_total NUMERIC(12, 2) GENERATED ALWAYS AS (quantity * unit_price) STORED
);

```

4. UI/UX Page Layouts & Wireframes

4.1 Create/Edit Quotation Form (`/dashboard/quotes/new`)

This layout uses a two-column distribution layout optimized for single-screen dense data input.

[Top Bar] Title: Create New Quotation | Field: Quote Number Auto-Gen (e.g., PW-2026-X)

- Left Side: Customer & Core Metadata**
- Customer Select Dropdown (with "Add New Customer" modal trigger)
 - Issue Date Picker
 - Status Dropdown Selector (Draft / Sent / Approved)

- Right Side: Operational Notes & Terms**
- Internal Notes Textarea (e.g., "Client requested vinyl finish options")
 - Standard Terms & Conditions text field

[Dynamic Line Items Table]

Item / Service Title	Description / Details	Qty	Unit Price (LKR)	Total	Action
e.g., Label Design Artwork	Premium Ceylon Cinnamon Pouch Label	1	8,000.00	8,000.00	[🗑️]

+ Add Item Row

Subtotal: **0.00 LKR**
Discount (%): [0.00] | Tax (%): [0.00]
Grand Total: **0.00 LKR**

Save & Preview Quotation

4.2 Dashboard List View (`/dashboard`)

Provides status metric tracking and instant search filters to track pending agency revenue.

Quote ID	Customer	Date	Grand Total	Status	Actions
PW-2026-0042	Topleaf Plantations Pvt Ltd	2026-06-28	30,000.00 LKR	Draft	View Edit Export PDF
PW-2026-0041	Green Field Tea Exporters	2026-06-15	145,000.00 LKR	Approved	View Edit Export PDF

5. A4 Print-Ready CSS Specification

To implement seamless PDF exports via browser printing or automated servers, use this exact clean print stylesheet inside your Next.js application:

```

@media print {
  body {
    background: white;
    color: black;
    font-size: 11pt;
  }
  .no-print {
    display: none !important;
  }
  .print-card {
    border: none !important;
    box-shadow: none !important;
    padding: 0 !important;
  }
}
@page {
  size: A4;
  margin: 20mm;
}
table {
  page-break-inside: avoid;
}
}

```

6. Direct Copy-pasta Master Prompt for AI Code Engines

Copy the prompt box below and paste it directly into **v0.dev**, **Claude**, or **Bolt.new** to generate your workspace interface immediately:

Build a Next.js 14 App Router dashboard view for an internal Quotation Management System utilizing Tailwind CSS and Shadcn/UI components.

Requirements:

1. "Create Quotation" Form View: A high-density, multi-column workspace layout. Left side handles customer selection and quote details (Issue Date, Status enum ['Draft', 'Sent', 'Approved']). Right side contains textareas for operational terms/notes.
2. Dynamic Line Items Table: Allow users to dynamically push/delete row elements. Columns: Service Title (input), Detailed Description (textarea), Qty (number input), Unit Price LKR (number input), and Auto-Calculated Line Total.
3. Live Financial Calculator Block: Bind reactive state to instantly compute Subtotal, applying variable Discount% and Tax% modifications to display a clear Grand Total highlighted in a Slate-900 status container.
4. Clean, modular UI structure using Radix-based primitives matching clean professional agency operational environments. Ensure table states handle dense text perfectly.
